DETAILS

The church's vision for its local community needs to focus not on what the community can do for the church, but what the church can do for its community. If the church was empowered to support their local communities, imagine what this would do for the wellbeing of these communities.

Community Engagement in the local community is of paramount importance to the future wellbeing of our communities.

We believe that a 'supported tenancy is a successful tenancy'.

The outcome of a successful Church-Based Community Engagement Strategy will mean that our tenants will be a part of an inclusive community.
